# Körber Digital - Who we are

We build the manufacturing industry and supply chains of tomorrow

As the home for entrepreneurs, Körber is a global technology group with 12.000 employees in 100 locations, posting sales of €2 billion in 2021.

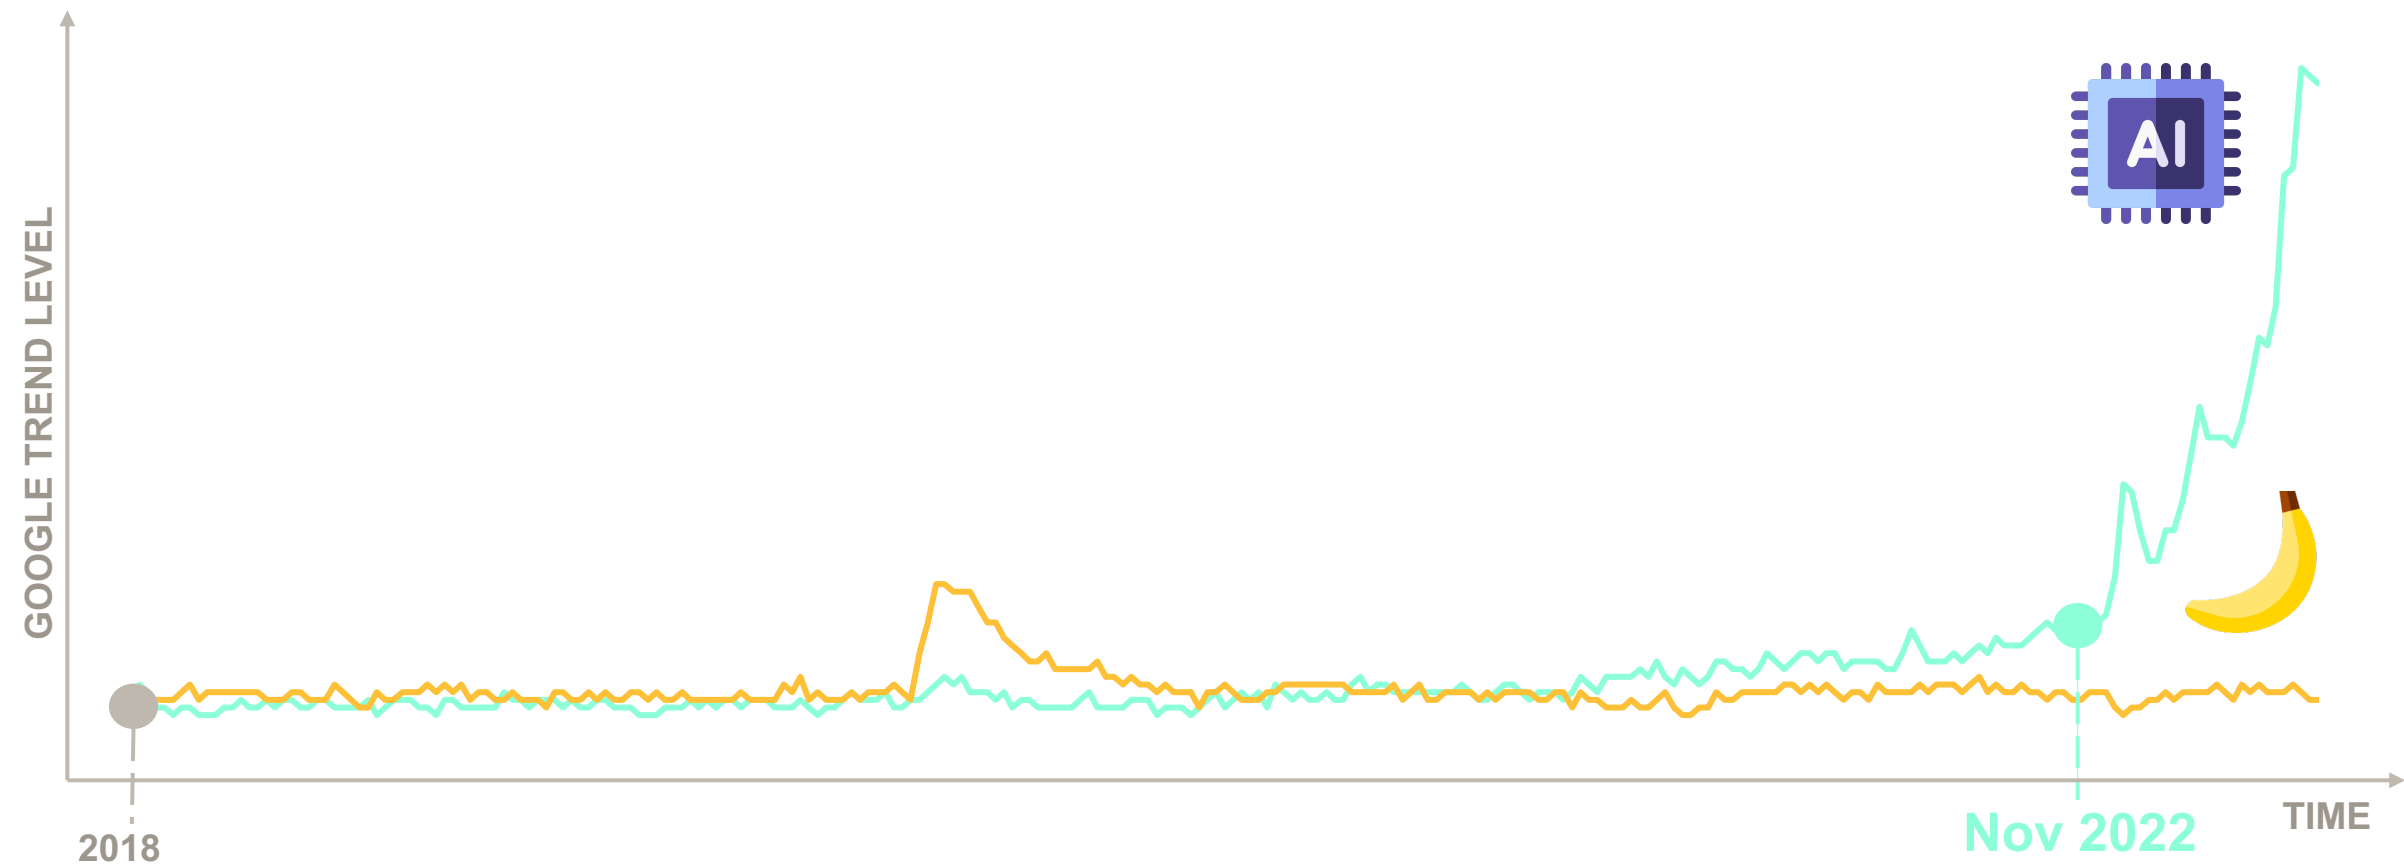

And as the youngest Business Area, Körber Digital, shapes and strongly promotes the digital advancement of the entire Group, building technology companies for AI-powered manufacturing efficiency and developing new digital business models.

We are the first company builder to use artificial intelligence and deep tech to increase manufacturing efficiency to transform global manufacturing digitally.

We achieve our goal by co-creating businesses and integrating them into a growing manufacturing ecosystem where advanced AI and IIoT technologies are available to all industry participants.

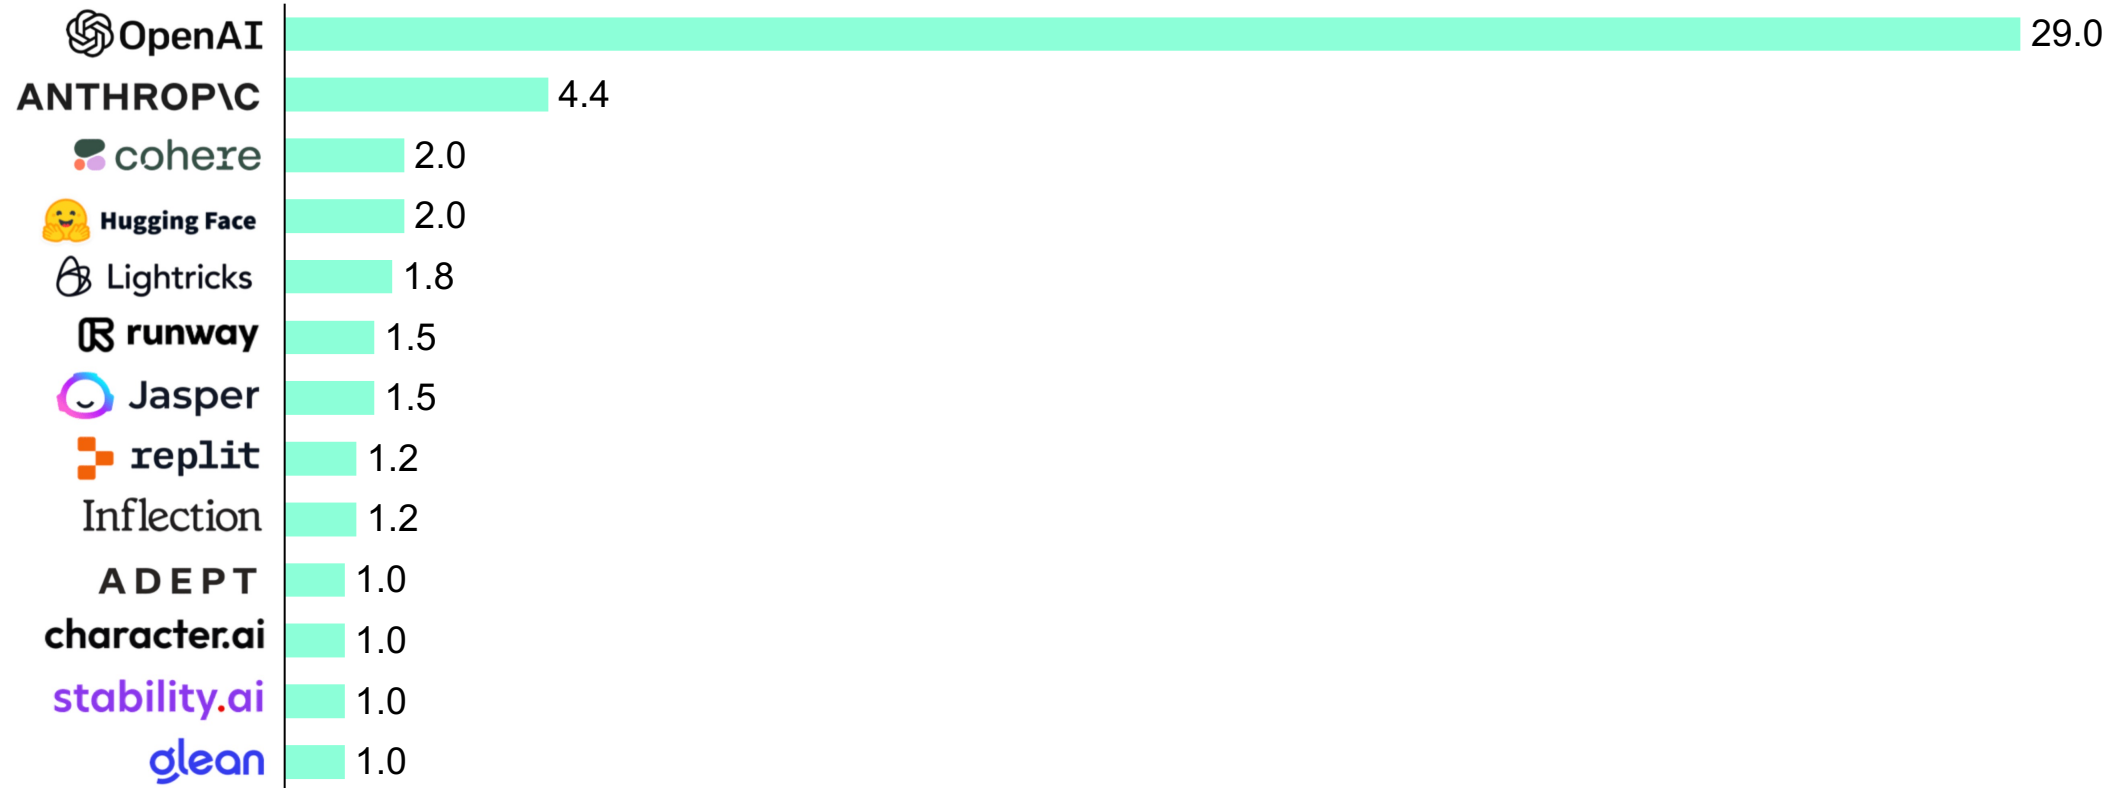

# Everybody is into AI these days

# VCs are moving into generative AI rapidly - pushing 13 unicorns already

Start-Ups in the generative AI space with a USD 1bn+ valuation

# AI tools just keep entering the market
